# HALO SS

The Halo SS is a seamless 360 degree gaming display

Each display comes with our “REACT” Adaptive RGB lighting system, which synchronises the LED trims and ambient uplighting to the colour of the video being displayed for a more immersive gaming experience.

Driving the display is a WiFi enabled media player, allowing remote content updates.

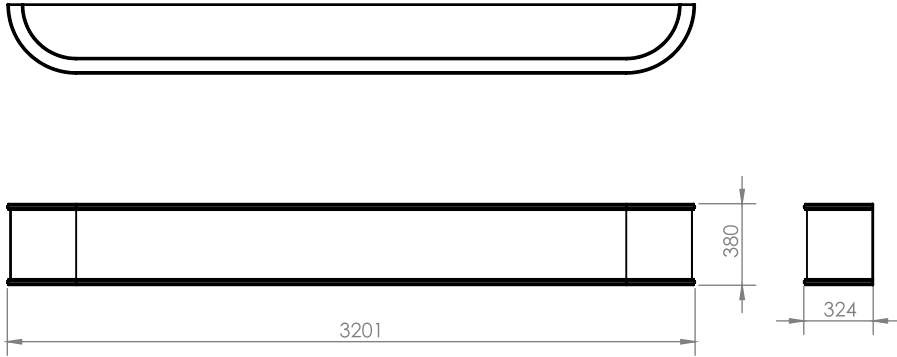

Wrapped in gloss black trims, the Halo will suit any decor.

Precision Signs offer content support with each Halo purchase, which includes free game theme changes if required for 12 months.
